

Emcephob Basic Cleaner

Anti graffiti-cleaner

Product Properties

- Solvent containing
- Ready-for-use, easy application
- Application by paint-brush and brush
- Gel-like consistency, drip-free application
- Registered at the German Federal Environmental Agency

Areas of Application

- Removal of graffiti on Emcephob NanoPerm P, Emcephob NanoPerm T, Emcephob NanoWax
- Only to be used in combination with these products
- REACh-assessed exposure scenarios: periodical inhalation, application

Application

Product Description

Emcephob Basic Cleaner is especially developed to remove graffiti on Emcephob NanoPerm P, Emcephob NanoPerm T and Emcephob NanoWax. It is ready-for-use and therefore offers a rapid, easy and thorough removal of graffiti, coloured pencils, markers and lacquers.

Graffiti Removal

Emcephob Basic Cleaner is applied onto the stained areas using a soft brush and spread in circles. On rough substrates Emcephob Basic Cleaner must be applied by brush.

After a short waiting time of approx. 2 - 3 minutes (max. 5 min.) the paint can be removed from the substrate using a rubber squeegee, disposed properly with paper towels and washed off with a moist sponge. Tenside-containing water increases the cleaning intensity.

If Emcephob NanoWax-surfaces are cleaned with Emcephob Cleaner, Emcephob NanoWax must be

removed not only in the area of the graffiti but also up to the next component or surface interruption.

The etched paint must not dry during cleaning. Therefore high wind velocities and direct sunlight must be avoided.

Safety Measures

Protective gloves and goggles must be worn when working with Emcephob-Cleaner. DIN-safety data sheets must be observed!

Additional Cleaner

Emcephob Shadow Cleaner

Remaining colour shadows after cleaning with Emcephob Basic Cleaner can be removed with Emcephob Shadow Cleaner. Therefore the relevant areas are cleaned by means of a cloth damped with Emcephob Shadow Cleaner.

General Information

Please request or technical advice in advance.

Technical Data for Emcephob Basic Cleaner

Characteristic	Unit	Value*	Comments
Density	kg/dm ³	0.96 1.05	Emcephob Basic Cleaner Emcephob Shadow Cleaner
Mixing ratio			ready-for-use
Reaction time	minutes	≥ 2 5	minimum maximum
Coverage**	g/m ²	approx. 150 - 200 as required	Emcephob Basic Cleaner Emcephob Shadow Cleaner
Application conditions	°C % K	≥ 5 - ≤ 30 ≤ 80 3	air, material and substrate temperature relative humidity above dew point

Product Characteristics Emcephob Basic Cleaner

Colour	transparent	
Delivery	10 kg buckets 5 kg buckets	Emcephob Basic Cleaner Emcephob Shadow Cleaner
Storage	Can be stored in original sealed packages in dry conditions for at least 9 months (Emcephob Basic Cleaner; Emcephob Shadow Cleaner = 24 months). Protect from frost! The same requirements are valid for transport.	
Disposal	Packs must be emptied completely.	

* All technical data relate to + 23 °C and 50 % relative humidity, material temperature between + 15 °C and + 25 °C.

** Depending on substrate and graffiti-paint coverage rates may vary.

Note: The information on this data sheet is based on our experiences and correct to the best of our knowledge. It is, however, not binding. It has to be adjusted to the individual structure, application purpose and especially to local conditions. Our data refers to the accepted engineering rules, which have to be observed during application. This provided we are liable for the correctness of this data within the scope of our terms and conditions of sale-delivery-and-service. Recommendations of our employees which differ from the data contained in our information sheets are only binding if given in written form. The accepted engineering rules must be observed at all times.
