The contemporary electronics industry is characterised by a high degree of specialisation with ever shorter product life cycles. Precisely in such a dynamic environment innovation, flexibility and a special quality consciousness are of great importance. You are producing filigree electronic components in ultra-modern production lines. The most stringent demands regarding tidiness, cleanness, safety and functionality must be met here. The same goes for the planning of your industrial flooring – especially when high stress and particular conductivity is required. In all respects MC's flooring systems offer the ideal solution.

Protection, refinement and asset preservation of your industrial flooring

MC-DUR 1850 ESD The Coating System for the Electronics Industry

Certified Safety

- ESD-appropriate floor coating
- with ESD-shoe kit for ESD protected areas (EPA) suited

System Benefits

- resistant to mechanical stress
- solvent free
- waterproof
- seamless, level and pore-free

Specific requirements demand specific solutions!

You have a particularly broad stress spectrum? Use a unique solution, even on cracked substrates and also as special water protection system. Your floor is subject to extreme mechanic stress? Choose an extremely hard-wearing industrial floor. Ideal for any wear and impact loads.
