Reciprocating Pump PN314-3K

Working pressure	10 – 144 bar
Delivery	at 1:1 = max. 13l/min
	With exchange piston set 1:3 = max.9l/min
Air pressure	max.8 bar
Compressor output	min. 800 l/min
Weight	70 kg
Height/ width/ length – working position	(cm) 100 / 54 / 55

Rinsing pump Type PN12

Working pressure – infinitely variable	20 – 250 bar
Delivery	3 l / min
Pressure ratio	1 : 31

Advantages:

- Pressure gauge units with monometers at machine outlet for pressure control of each component
- Big material passages – suitable also for highly viscous material
- All material contacting parts of stainless steel (INOX)
- Can be equipped with DESOI flow control (electronic recording system)
